

Downy Hawthorn

Crataegus mollis

-Are you sick and tired of looking at your neighbors' lot? Moreover, does his dog come into your yard and do things that you preferred that it wouldn't? Maybe you are in need of some shrubs for a privacy screening. Downy Hawthorn is not only a good shrub for privacy screening, but it will keep the neighbors' dog at bay because of its long thorns.

-Downy Hawthorn can grow to heights of 12 feet tall and is a very attractive shrub throughout the year. Plant Downy Hawthorn in areas of full sun to partial shade.

-Thorns not your thing, well Downy Hawthorn has cultivars that are thorn-less.

**Teach me half the gladness
That my brain should know
Such harmonious madness
From the lips would flow
The world should listen then as I am listening now.**
