

Gray Dogwood

Cornus racemosa

-Gray Dogwood is a nice medium sized shrub that can grow in just about any conditions. It can grow to heights of 10 feet.

-The flowers are very pretty and the fruits are treasured by wildlife. If you are looking for some shrubs that will attract wildlife and feed a lot of songbirds, may I suggest Gray Dogwood, High-bush Cranberry, Nannyberry, Black Chokeberry, Silky Dogwood, Winterberry, and Snowberry.

-Now check this out. Take that aforementioned mix and plant your favorite tree in the middle of it. Then take some ferns to plant on the shady side of the shrubs and some of your favorite wildflowers on the sunnier side of the shrubs, and you will have a beautiful landscaped piece of property.

Do what you can, with what you have, where you are.

-Theodore Roosevelt
