

New Jersey Tea

Ceanothus americanus

-Did you know that the colonists used the leaves of New Jersey tea during the Revolutionary War as a substitute to the dirty nasty English Tea?

-New Jersey Tea is a small shrub that will only reach 3 feet tall at maturity.

-Why not throw some New Jersey Tea in along the borders of a wildflower garden? If you were to put some rocks around the New Jersey Tea, you would have a dramatic and attractive border.

-New Jersey Tea grows best in full sun to partial shade.

I have a basic belief that what is wise is possible to do.

-Gro Harlem Brundtland
